EXECUTIVE SUMMARY

- 5+ months of experience as an AI Analyst
- Shipped clean, functional academic and personal projects
- Passionate about scalable architecture and AI-enhanced engineering

TECHNICAL SKILLS

Languages

- Java · C++ · Python

Frameworks & Tools

- JavaFX · QT · Streamlit
- SQLite · Uvicorn · Proteus

Version Control

- Git & GitHub

Concepts

- OOP · DSA · Software Engineering
- AI Workflow Integration

LANGUAGES

- English — Fluent
- Urdu / Punjabi — Native

CORE STRENGTHS

- Analytical thinking & problem-solving
- AI-powered productivity & optimisation
- Confident communicator & presenter

INTERESTS

- Gym & distance running · Badminton
- Reading · Computing & AI trends

EDUCATION

B.Sc. Software Engineering — COMSATS University Islamabad, Lahore Campus

Sep 2024 – Present · Expected Graduation: 2028

Coursework: Programming Fundamentals, OOP, DSA, Software Engineering, Discrete Structures, Digital Logic Design, ICT.

PROJECTS

Financial Management System · Java · JavaFX

Academic Project — Semester 1

- GUI-based expense tracker with monthly budget monitoring and auto-generated Excel reports based on user-defined savings targets.
- Designed with an intuitive JavaFX interface, prioritising usability for non-technical users.

Event Scheduling System · C++ · QT

Academic Project — Data Structures & Algorithms

- Calendar application with multi-event management and timed reminders; built on a full DSA foundation — hash tables, binary trees, max/min heaps, and linked lists.

AI Interview Coach · Python · Streamlit · SQLite · Uvicorn

Personal Project

- AI-powered web app that helps candidates improve spoken communication for interviews through real-time feedback on clarity, structure, and confidence.
- Full-stack: Python/Uvicorn backend, Streamlit frontend, SQLite for session persistence.

EXPERIENCE

AI Analyst — Freelance / Independent

Nov 2024 – Present · 5+ Months

- Designed AI-assisted development workflows, reducing manual overhead across code generation, review, and documentation tasks.
- Conducted systematic experiments with LLMs to evaluate their effectiveness for real-world software engineering use cases.
